

PALORA P6

Delivering Timeless and Wider Views for Luxury Outdoor Spaces

KEY ADVANTAGES

The P6 features louvers with built-in rubber seals to block rain and reduce wind vibration. Its large-span design supports up to 4×6m single bay and 4×10m dual bays, offering strong stability with fewer posts for a cleaner look and wider view—an ideal choice for premium outdoor spaces.

01

PREMIUM ANTI-RUST PARTS

Constructed from high-strength aluminum alloy or 304 stainless steel, these internal parts resist outdoor rust even after long-term use despite near the sea.

02

WIDE-SPAN FRAME DESIGN

Single bay reach up to 4×6m and dual bays span up to 4×10m, offering a stronger structure with fewer posts for a cleaner design and a broader, open view

03

SMARTPHONE APP CONTROL

Easily manage both louvers and lighting through the all-in-one Tuya APP — enjoy full control right from your phone.

04

DIVERSE OPTIONAL ITEMS

Choose the right accessories to create a unique outdoor experience for all seasons, such as LED/RGB Light, Zipped Blinds, Glass Doors, Heaters and more!

05

IP67 WATERPROOF MOTORS with **CE & UL** Certifications

Equipped with 24V low-voltage motors rated IP67 for safety and durability—ideal for stable, all-weather outdoor performance.

06

ALL-WEATHER PROTECTION

Engineered with integrated drainage and sealed louvers, the P6 pergola offers year-round waterproof and sun-shading performance—ideal for both summer heat and rainy seasons

07

EASY INSTALLATION SYSTEM

Installing the pergola is as straightforward as assembling modular furniture, allowing even beginners to achieve a clean, professional finish with ease.

08

BUILT TO LAST, BACKED BY WARRANTY

Includes a 15-year structural warranty and a 5-year motor warranty—ensuring long-term durability and worry-free performance.

PRODUCT SPECIFICATION

A Post	150x150mm
B Beam	188x115mm
C Blade	180x45mm
D Motor Waterproof Rating	IP67
E Material	Aluminum 6063 T6

PRODUCT SIZE

Maximum Projection
(Single Bay)
6000mm

Maximum Width
(Single Bay)
4000mm

PRODUCT FEATURES

PREMIUM MATERIALS :

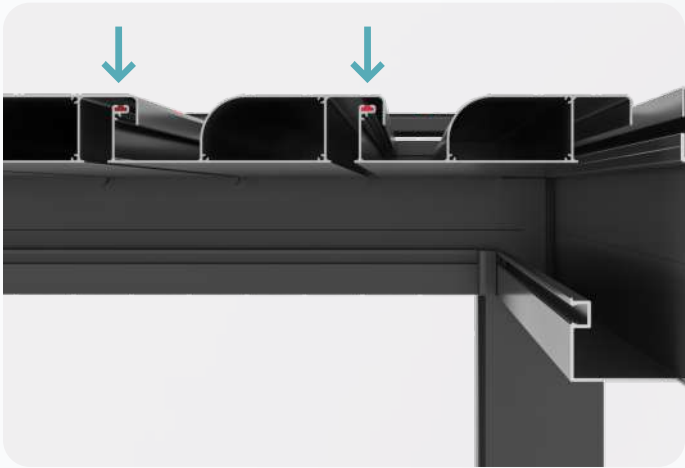

Crafted from 6063 T6 aluminum with AkzoNobel coating for superior corrosion and rust resistance—built to last in any climate.

Dual-Cavity Waterproof Safety

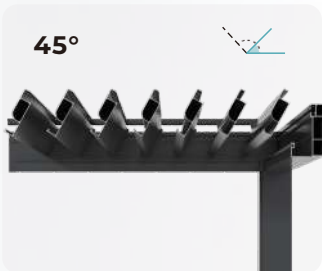

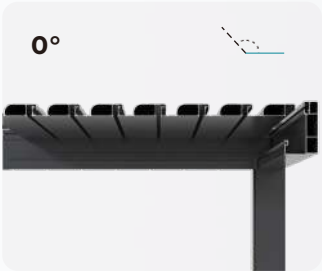

The post is pre-engineered with a patented dual-cavities design to achieve water and electricity separation for outdoor safety. Light strips, motors and wires are powered by a low-voltage system. All cable joints are aircraft grade waterproof connectors for quick assembly, long service life and no leakage current. Trouble-free for post sales.

DESCRIPTION OF LOUVER ROTATION

SEALED STRUCTURE DESIGN

Each louver is fitted with an integrated rubber seal to effectively block rain and reduce vibration caused by wind, ensuring a more stable and weatherproof structure.

Blades adjustable from 0° to 110° sealed in closed position

Blades open wide for flexible shade and better ventilation — ideal for open-air comfort.
